

IECEX Panel Filters

For Use in all EX Zones

Excellence in filtration

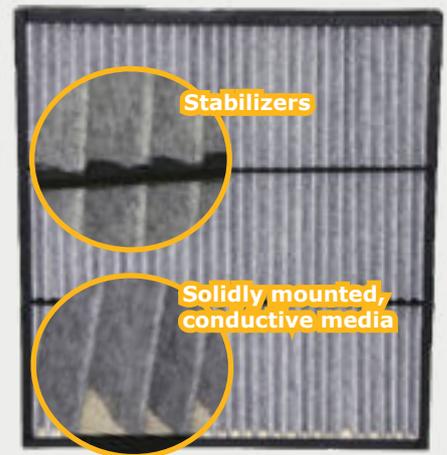

IECEX Panel Filter

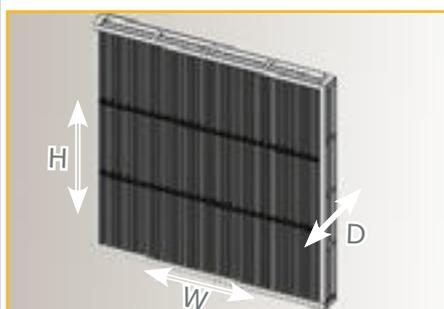

EMW®'s IECEX-certified air filters comply with IECEX standard and are suitable for use in all EX zones. Designed for heavy-duty offshore applications, the new IECEX panel filter provides reliable operation under even the toughest conditions.

Stabilizers integrated in the filter protect and maintain the pleat pattern in the media, ensuring low initial pressure drop with minimal increase in subsequent operation.

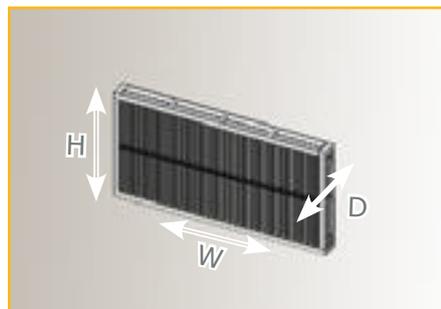

The **conductive synthetic media** is **solidly mounted** around its entire perimeter in a dissipative plastic frame. A seamless cast-in-place seal holds the air filter firmly in place without leakage.
